

## Project Description:

Project Name: Personal Website Redesign

Project Overview: This project involves designing my personal website using HTML, CSS, and vanilla JavaScript. The primary goal is to create an engaging and user-friendly online platform that showcases my skills, portfolio, and personal information. The redesigned website will be responsive, visually appealing, and provide a seamless user experience.

## User Personas:

Recruiter for a Tech Company - Alice

Age: 32

Background: A recruiter looking for potential candidates

Goals: To explore my professional experience, skills, and portfolio to evaluate my suitability for job openings.

Needs: Clear, organized content that highlights my work and qualifications, with a professional look and feel.

Computer Science Student - Bob

Age: 25

Background: A fellow computer science interested in my experience and skills

Goals: To check out my coding projects and gain insights into my development techniques.

Needs: Access to my code repositories, details about my tech stack, and the ability to contact me for collaboration.

As a Professional Recruiter for a Tech Company - Alice:

Story 1: Alice wants to learn more about my professional background. She navigates to the 'About Me' section and reads about my work history, education, and qualifications.

Story 2: Interested in my previous projects, Alice looks for my portfolio. She clicks on the 'Portfolio' link, explores my work, and is impressed by the diversity of my projects.

As a Fellow Computer Science Student - Bob:

Story 1: Bob wants to see the code behind one of my projects. He goes to my 'Projects' section, selects a project, and finds a link to the GitHub repository where he can access the code.

Story 2: Bob is curious about my preferred tech stack. He visits the 'Skills' section to see which technologies and programming languages I specialize in.

## Design Mockup

**Profile Picture:** A prominent and professional profile picture of myself can be placed on the left side at the top.

**Menu:** The menu should be vertically aligned on the left, displaying the following options: About Me, Education, Projects, Skills, Interests, Resume, and Contact Me. These interactive menu items allow users to click on them to navigate to the respective sections on the right.

**Main Content:** The right side of the page will display the main content of my website. When a menu item on the left is clicked, the content on the right will scroll to the selected section. This creates a seamless and user-friendly navigation experience.

**Responsive Design:** Ensure that the design is responsive and adjusts gracefully to different screen sizes and devices, so it looks great on both desktop and mobile.

Here's a brief explanation of how the menu would work:

When a user clicks on "About Me" in the menu, the content on the right scrolls to the "About Me" section.

Similarly, clicking on other menu items like "Education," "Projects," "Skills," "Interests," "Resume," or "Contact Me" would smoothly scroll the content to the respective sections.
